Welcome to... Pearlite Steel

We are pleased to provide this Company Catalogue for your use. Please call or email us for more comprehensive information about products and Services.

Stainless Steel is something with which we have been closely associated with more than two decades now. Manufacturing of Stainless Steel Tubes and Pipes is the latest in our product portfolio. Pearlite Steel has been able to transform itself from a domestic stainless steel pipe and tubes manufacturing company into a booming global business with a solid reputation as well as a foothold in international markets. We are on the way to becoming export powerhouse in India for SS Coil & Tube Products.

Pearlite Steel constantly strives to improve the quality of life of the communities we serve through excellence in all facets of its activities. We, at Pearlite Steel, are committed to creating value for all our national as well as international clients by continually improving our production system and process through innovation involving all our employees from worker int the plant to top management. We do not only produce Stainless Steel Coils and Tube but also provide solutions for each and every need of our clients for the same.

Regards,
Sanket Faldu
Managing Director,
Pearlite Steel

About us

Since last two decades, we have been assiduously surpassing our goals step by step in the stainless steel industry across the Asian sub-continent. We are Pearlite Group, a conglomerate based out of Western India. From Stainless Steel Tubes & Coils to Stainless Steel Hardware Products, to Modular Kitchens, we have been a versatile business group through all these years. The state-of-the-art unit of Pearlite Steel is located in the western part of India in the state of Gujarat. The plant has manufacturing facilities with world class technology and latest equipment a production capacity of up to 20,000 tons per annum. With a turnover that has increased ten-fold since its formation, Pearlite Steel quickly turned itself from a local player to an international customer-centric business that aims at providing innovative tubular solutions to the industry.

At Pearlite Steel, we offer a balanced product portfolio of ERW Welded Stainless Steel Tubes & Pipes of globally recognized ASTM Standards. Nevertheless, Welded Tubes of ASTM A-554 standard is something that we consider as our area of expertise. Although our client base is encircled across parts of Europe, Latin America, Saudi Arabia, United Arab Emirates, Srilanka, Mauritius, and Turkey, our focus remains on creating a superior traction across the emerging economies like BRICS (Brazil, Russia, India, China, and South Africa).

Quality & Innovation

We operate on a commitment to a quality experience, from the time of our first contact with you to the time your product is complete and in your possession.

Our ISO 9001:2008 certified plant is a testimony to our commitment towards quality. ISO 14001:2004 and OHSAS 18001:2007 systems certification of the plant ensure our commitment towards the environment and providing a safe workplace for our employees. To ensure quality at every step, we adhere to the most stringent industrial standards, additionally, the production processes are constantly monitored and controlled so that finished products are as per customer's requirements.

All the materials used by Pearlite Steel are of premium quality and compatible with the latest machinery and manufacturing technologies. The technical and commercial quality guidelines of Pearlite steel are set to high standards.

Our R & D focuses on continuous upgradations of Quality, Processes, and Services to develop new products at competitive costs. Cross-fertilization of knowledge between production and Quality Control in order to maintain Global Standards has been the guiding principle of our Manufacturing units.

Currently our R & D is working on :

Cost reduction by process development, optimization and refinement to provide a consistent competitive edge.

Quality up-gradation of existing products to enable enhanced global acceptance

Technology enhancement to increase quality production

Knowledge sharing with customers and assisting them in their operations and applications of our products
